

Journey today + proposed journey

STEP 4

4
MAF

Where it sits: DM has sent the MAF link. Merchant must now complete the form. This is the highest-friction point in the entire journey — for everyone.

TO-DAY

The reality: fragmented, merchant-hostile, internally duplicated

HIGH FRICTION

COMPLETION RATE
85% incomplete on first send
Merchant confusion drives re-work loops between DM, SE & merchant

SYSTEM FRAGMENTATION
2 disconnected systems
DM has to navigate CKO tools; merchant just sees a broken experience

MERCHANT BURDEN
Heavy lift entirely on merchant
No pre-fill, no guidance, no context — they're handed a blank form

INTERNAL COORDINATION
Siloed DM → SE handoffs
No single owner; merchant chased by multiple people with conflicting info

PRO-
POSED

AI-first MAF: one hub, merchant shielded,
one team behind it

AI-
FIRST

AI-FIRST

DM+AI pre-fills the MAF from Salesforce & deal context. Merchant only attests — not data-entry.

**MERCHANT
PROTECTED**

Merchant sees one clean hub. Our internal systems, complexity & tool-switching are invisible to them.

#ONETEAM

Single onboarding hub owned jointly by DM & SE. One coordinated voice to the merchant.

WHAT CHANGES IN PRACTICE

- AI drafts MAF from SF data before DM sends
- Merchant only attests — zero blank forms
- DM & SE aligned on one view, one timeline
- Single onboarding hub replaces 2 systems
- AI quality check catches gaps before submission
- Sent globally at deal kickoff, not as afterthought
